

Hoptroff Traceable Time as a Service (TTaaS®)

Offering a secure and resilient end-to-end
precision timing service that seamlessly
integrates into existing infrastructure

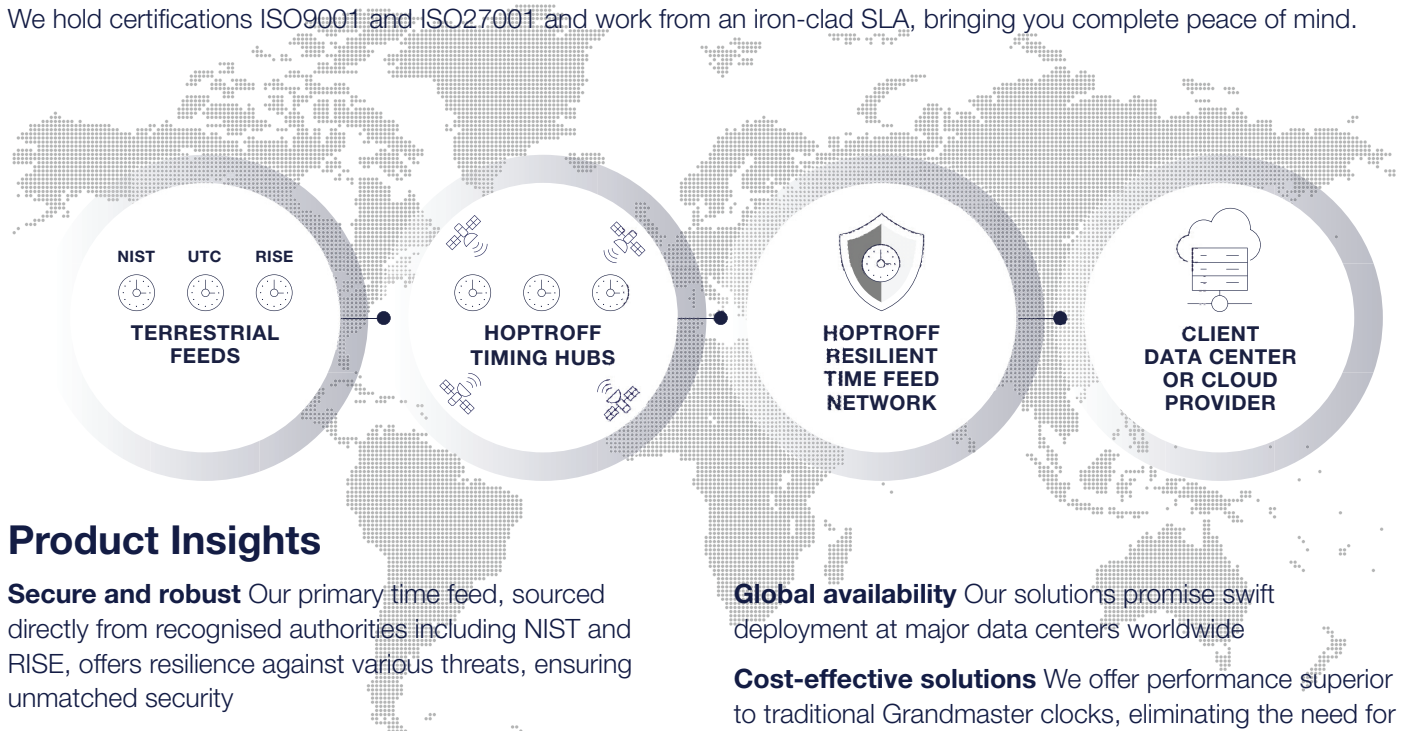

TTaaS®

HOPTROFF SMART TIMING™

We offer advanced software and service-based systems at the forefront of timing and synchronisation. Our solutions consistently deliver resilient, accurate, and traceable Coordinated Universal Time (UTC) to any location worldwide. We hold certifications ISO9001 and ISO27001 and work from an iron-clad SLA, bringing you complete peace of mind.

Product Insights

Secure and robust Our primary time feed, sourced directly from recognised authorities including NIST and RISE, offers resilience against various threats, ensuring unmatched security

Flexibility and compatibility Our products support standard NTP and PTP protocols for seamless integration, ensuring reliable performance in various environments

Exceptional customer service Our team's ISO certification and vast expertise guarantees best-in-class service, allowing you to focus on your primary business operations

Global availability Our solutions promise swift deployment at major data centers worldwide

Cost-effective solutions We offer performance superior to traditional Grandmaster clocks, eliminating the need for additional overheads or expensive installations

Accessible to all Hoptroff TTaaS® Free is our contribution to public service, offering a foundational level of time service over the internet

Features and benefits

Compact and efficient

Our NTP and PTP client boasts a small footprint and guarantees optimal performance and accuracy at the endpoint

Secure terrestrial time feed

Drawing directly from official UTC sources and built with Zero Trust architecture, our time feed offers uninterrupted and precise timing

Proactive monitoring

Our comprehensive monitoring and administrative services ensure preemptive solutions to potential challenges

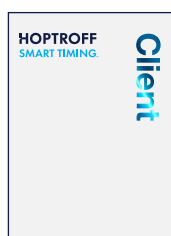

Regulatory adherence

Our versatile compliance system is tailored to meet SEC, FINRA CAT NMS, MiFID II, ISO 9001 and ISO 27001 standards

Dedicated support

Our on-call service delivery team guarantees outstanding client satisfaction
